ABSTRACT

Money laundering impacts the UK not only on an economic level but also raises a “moral obligation,”¹ to not only follow the “country’s money laundering prevention rules” but also to work in accordance to “HM Revenue & Customs (HMRC),” who is responsible for tracking the “registration” of companies, following investigations of companies, where there exists a failure to follow “proper due diligence” procedures, and when rules are broken in terms of “proper record-keeping.”² Even after the UK leaves the EU, it will still be required to adhere to the principles of law established by the various inter-governmental regimes responsible for detecting and stopping illicit and criminal activity.³ Likewise, preventative measures have been taken in the US, who follows a “risk-based due diligence” effort toward combatting money laundering, who are also responsible for the collection and assessment “designated target[s] [who may be] subject to sanctions” upon the transfer of monies in which those persons can also be identified as “politically exposed persons” and their correspondent banks, customers, and any beneficial owners involved in activities requiring the “freeze, seiz[ure], [or] confisc[ation] of any assets belonging to those transactions, in order to “protect financial institutions from criminal and civil liability.”⁴ FATF is The Financial Action Task Force responsible for setting standards and promoting effective implementation of “legal, regulatory and operational measures” for combatting money laundering, terrorist financing, financing the proliferation of weapons of mass

INTRODUCTION

According to the National Crime Agency's National Strategic Assessment 2017, money laundering alone costs the UK an "estimated £24 Billion" a year,⁹ whereby the illegal proceeds from serious and organised crime, drugs, cybercrime, and people trafficking are "laundered through UK banks and other regulated businesses, ... includ[ing] money from international criminal activity or corruption."¹⁰ Taking its toll on society, and requiring new professional standards as a growing "social basis for fighting against money laundering" continues.¹¹ Banks and Financial Institutions in the UK, are being pressured to look beyond a purely "regulatory perspective" alone, while taking extreme measure to "enhance their procedures and due diligence."¹² Such as engaging in the "Flag It Up Campaign, which focuses on the social impact of money laundering ... [and requires the filing of] suspicious activity reports."¹³

In the UK the anti-money laundering regime is composed of the following organizations and required to follow the following laws and rules set out in the "Proceeds of Crime Act 2002 (POCA), the Money Laundering, Terrorist Financing and Transfer of Funds (Information of the Payer) Regulations 2017 (MLR 2017) and the Terrorism Act 2000 (TA 2000) and the Terrorism Act 2006 (TA 2006)."¹⁴ Other Organizations that are involved in Anti-Money Laundering are the IFA, the NRA "UK National Risk Assessment of Money Laundering and Terrorist Financing,"

HM Treasury, Home Office and the National Crime Agency (e.g. Flag It Up Campaign). The newest “regulator set up by the government to strengthen the UK’s anti-money laundering (AML) supervisory regime and ensure the professional body AML supervisors provide consistently high standards of AML supervision” is The Office for Professional Body Anti-Money Laundering Supervision (OPBAS).¹⁵

AML has three stages: placement, layering, and integration,¹⁶ and 5 pillars. The purpose of anti-money laundering laws, regulations, and procedures are to “prevent criminals from disguising illegally obtained funds as legitimate income.”¹⁷ One of the major differences between AML in the US and the UK, is that in the US there is BSA, US Patriot Act, and OPBAS, whereas in the UK there are CIP Requirements for Beneficial Interest, an Action Plan, and EU Directives, and after Brexit, this may also have an effect on AML Compliance.

Both the US and the UK “anti-money laundering laws and regulations compare favorably in that both regimes stipulate extensive regulatory requirements for banking institutions to implement and maintain anti-money laundering procedures.”¹⁸ Both have implemented procedures such as: (1) customer due diligence programmes (2) designation of a compliance officer (3) ongoing training programmes (4) audit procedures to test for effectiveness and (4) suspicious activity reporting requirements.¹⁹ Recently, FATF “an intergovernmental body that

develops policies to combat financial crime” stated that the UK is doing an insufficient job at “investigat[ing] high-end money laundering.”²⁰ While each country has its own unique system for detecting and combatting money laundering the US seems to be doing a better job than the UK. Similarly OPBAS found that “despite EU requirements, ... 80 percent failed to have the proper governance arrangements [required] to combat [money laundering],” it seems as though most members are not sufficiently being trained, and such lack of preparation, is making it difficult to keep up, there simply “isn’t enough regulation going on.”²¹ And with *Brexit* ongoing, “it is possible that regulators will continue to prefer lax regulation implementation if it encourages investment and combats economic damage caused by instability.”²²

LITERATURE REVIEW

The two main approaches to tackling Anti-Money Laundering are enforcement and prevention.²³ In the UK “the cornerstone of the enforcement approach is provided by the 2002 *Proceeds of Crime Act*, in which virtually “any interaction with the proceeds of crime” is criminalised. The Act created offences of concealing (section 327), arranging (section 328) and acquisition (section 329) of proceeds of crime and sets out provisions for the confiscation of assets acquired through criminal activity.”²⁴ When it comes to prevention, two approaches have

been taken a “rule-based and a risk-based” approach.²⁵ Its important to note that: “Across most countries in the world, financial entities and designated nonfinancial businesses and professions (DNFBPs) are required to follow certain rules in relation to the prevention of ML.”²⁶ A rule-based system, focuses on corporate social responsibility as well relies heavily on “suspicious activity reporting,” (SARs).²⁷ It involves the “standardisation of rules and regulations ... which is hard to measure.”²⁸ In a risk-based approach, “there is a requirement that appropriate steps are taken to identify and assess risk (whether these be customers, products or services).”²⁹ This involves organizations such as the Financial Action Task Force (FATF), which requires members to be aware of the risks, as well reiterated in the EU’s 4th Money Laundering Directive, who defines a risk-based approach as one that is able to “identify, understand and mitigate the risks of money laundering.”³⁰

In general a qualitative approach has been taken when measure the risks associated with Anti-Money Laundering “The first UK NRA (see HM Treasury 2015) sets out an approach based around understanding the threats, vulnerabilities and consequences of ML.”³¹ The legal

landscape when it comes to Anti-Money Laundering is constantly changing, since 2018 “changes introduced under the Fourth Money Laundering Directive implemented in the UK via the Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017” to the 5th Money Laundering Directive adopted June 19, 2018.³² The five key issues, addressed in the revised directive are as follows: (1) safeguards for financial flows from high-risk third countries, (2) enhancing powers of the EU FIUs and facilitating cooperation, (3) ensuring centralized national bank and payment account registers or central data retrieval systems in all Member States, (4) tackling terrorist financing risks linked to virtual currencies, and (5) tackling risks linked to anonymous pre-paid instruments (e.g. pre-paid cards).³³ The new EU deadline to transpose the provisions into national law was January 10, 2020.³⁴

While *Brexit* was in the works, even if UK withdrew from the EU, “or any transition period, the government ... stated that the UK intend[ed] to implement the provisions of the 5MLD.”³⁵ The UK chose not to opt-in to the 6MLD (regardless of Brexit) “[to] not be bound by its provisions,” however even if they chose to be bound they would have “met many of the requirements.”³⁶ Meanwhile, the deadline for EU Member States to transpose provisions to national law is December 3, 2020.³⁷ “This Directive focuses on introducing a unified list of 22

specific predicate offences for money laundering activity which all EU Member States must criminalise in national legislation (if they have not already done so).”³⁸

METHODOLOGY

Anti-Money Laundering Laws are not unique to the UK, and exist in the US and in other countries, as well as in the EU. This study seeks to draw a comparison, between the systems put in place in the UK, and the ones whether similar or different put in place in other countries, are more or less effective in combatting in money laundering and crime. This dissertation takes a qualitative approach to analyzing the data compiled, by the various organizations responsible for monitoring crime, and responding to it, and what is being done to systematically deal with the problems arising due to criminal activity associated with money laundering. In recent years advances in technology have changed the landscape, when it comes to detecting crime, making it easier, and sometimes harder, this paper discusses those issues. Moreover, advances to the laws have been put in place and implemented, and this paper will discuss whether the laws prescribed implemented made a positive difference to the rate of crime in those countries. Overtime many things have changed, and while AML has become “more effective in dealing with the problem ... its complexity increases,”³⁹ with financial institutions are the “forefront of the fight against money-laundering.” This paper examines, the responsibility that financial institutions have to monitor and respond to crime, and the number of complex organizations who’s laws recommend these processes, explaining who put these laws into place, and what

³⁸ “2018: A year in review” *Anti-money laundering. Tackling illicit finance*, Kingsley Napley (January 2019), <https://www.kingsleynapley.co.uk/resources/download/363/2018-a-year-in-review-anti-money-laundering.pdf>.

organizations are responsible for calculating the risks associated with money-laundering, the rates of crime, and who dictates what laws are to be followed in order to adequately respond to this growing trend in crime rate in the UK and beyond. Furthermore, we will also be examining the effects that *Brexit* on the UK, in terms of the laws that they currently follow, should follow, and whether leaving the EU will have had any impact on their ability to combat money laundering.

DISCUSSION

AML Compliance in the UK and the US

FATF (Financial Action Task Force) “is an independent inter-governmental body” that is responsible for governing AML (“Anti Money Laundering”) compliance standards.⁴⁰ The recommendations used by FATF are used to help promote “international co-operation” and helps to establish “preventative measures ... taken by financial institutions ... casinos, real estate dealers, lawyers and accountants.”⁴¹ There have been recent developments in the UK trending (2018). In the US “AML/CFT issues ...” have become the forefront of combatting financial crime “at both federal and state levels” assessments are made, and “whether the recommendations” provided “have been fully and properly implemented” determines the effectiveness of the AML/CFT system implemented.⁴² Such international cooperation includes: (1) laws that prevent terrorist financing (2) laws that allow for the confiscation of proceeds of crime and terrorist funding (3) “an enforceable means that impose required obligations on

financial institutions (4) “institutional or administrative framework” that includes “duties, powers and sanctions.”⁴³ Depending on the “particular circumstances of [a] country” ... “assessors ... have [the] discretion [to] identify” what strengthens or weakens a current AML/CFT system put into place.⁴⁴ The assessors measure “positive, neutral, or negative influence[s] on the overall rating for each recommendation” to determine its fitness.⁴⁵ Under (3) mentioned above ... “designated non-financial business and professions (DNFBP), financial institutions, financing of terrorism (FT), legal persons and legal arrangements” are also taken into consideration with regard to “financial institutions ... fundamental to any AML/CFT assessment.”⁴⁶

According to *Global Compliance News*,⁴⁷ in 2018, the “EU Anti-Money Laundering Directive (AMLD 5)” took place to “modif[y] the fourth Anti-Money Laundering Directive ... released only in 2015.”⁴⁸ The purpose for this directive was to address the “beneficial ownership [of] information created under the AMLD4 ... [to] be made accessible to the general public [whereby] ... beneficial ownership information will be granted to any natural or legal person that can demonstrate a legitimate interest as well as to any person filing a request in relation to a trust

or similar legal arrangement which holds or controls any corporate or other legal entity.”⁴⁹ Under this provision “information on real estate ownership by any natural or legal person ... [is] made centrally available for public authorities.” These measures further enhance the “rights and competencies of national EU Financial Intelligence Units ... [which] exten[d] ... the cooperation and exchange of information among FIUs and other relevant institutions further facilitated.”⁵⁰

One of the key additions to AML in the UK has been the “failure to prevent (economic crime) clause” which has been implemented to make it a “criminal offense by a corporat[ion] [who] fail[s] to prevent economic crime” and to “reduc[e] the flow of illicit funds through the UK.”⁵¹ This would require “firms ... to undertake an extensive compliance review and implement a programme ... to ensure their compliance with legislation.”⁵² Part (c) of the clause states that “a person commits a money laundering facilitation offence when acting in the capacity of a person associated with (B) “a relevant body ... [who] is guilty of an offence.”⁵³ This includes “the acquisition, use or possession of criminal property, under section 329 of the *Proceeds of Crime Act 2002* (acquisition, use and possession).”⁵⁴ Furthermore, a “money

laundering offence” includes, in part, the “concealing, disguising, converting, transferring or removing criminal property under section 327 of the *Proceeds of Crime Act 2002*.”⁵⁵

The AMLD 5 (“*EU Fifth Anti-Money Laundering Directive*”)⁵⁶ was important because “with *Brexit* in view ... the UK will be closely watching ... aspects of it which relate to [the] beneficial ownership and the impact of the UK’s PSC register regime ... [is] of particular interest.”⁵⁷ In 2020, there will be “changes to anti-money laundering rules ... under the 5MLD” that will require “UK entities ... to carry out client due diligence (CDD) [and have] significant control [over] (PSC) register and trust registration services (TRS).”⁵⁸ Under the PSC regime, a TRS must be registered. What is a TRS? A TRS is a “private register held by HMRC which records beneficial ownership information about certain types of trust.”⁵⁹

The purpose of the AMLD 5 is to “combat terrorism and money laundering ... [with the potential to] “unmask for the first time the beneficiaries of thousands of secretive trusts.”⁶⁰ How can this be done? New customers will be “subject to the PSC regime or to registration on the TRS” collecting proof of the customer’s registration ... as part of its CDD measures.”⁶¹

Combatting terrorism and money laundering via the unveiling of thousands of secretive trusts was due in part in “response to the *Panama Papers*, in which a global consortium of journalists

⁵⁸ People with significant control register and trust registration service to become integrated into client due diligence requirements, <https://www.lexology.com/library/detail.aspx?g=eba407bb-13e6-46bf-8b7a-4a03831d6c08>.

⁵⁹ People with significant control register and trust registration service to become integrated into client due diligence requirements, <https://www.lexology.com/library/detail.aspx?g=eba407bb-13e6-46bf-8b7a-4a03831d6c08>.

⁶⁰ Juliette Garside, UK to adopt EU laws on combating terrorism and money laundering: Letter to MP Margaret Hodge confirms decision on fifth anti-money laundering directive, *The Guardian*, (July 23, 2018), <https://www.theguardian.com/world/2018/jul/23/uk-eu-laws-terrorism-money-laundering-margaret-hodge>.

⁶¹ People with significant control register and trust registration service to become integrated into client due diligence requirements, <https://www.lexology.com/library/detail.aspx?g=eba407bb-13e6-46bf-8b7a-4a03831d6c08>.

revealed the widespread use of trusts and opaque offshore structures to launder money generated from bribery, corruption, and tax evasion.”⁶² With the UK officially leaving the EU next March, negotiations are still ongoing, with Britain “promis[ing] to abide by all existing and new European laws,”⁶³ which include:

“the registering of company owners in every member state, access to the names of beneficiaries of trusts for law enforcement agencies and those with a “legitimate interest,” including the investigative journalists and *NGOs*, a cross-border database of company and trust owners, overseen by the *European Commission*, and automatic access to the names of bank account holders for national *financial intelligence units* [“FIUs”].”⁶⁴

Because there was “no-deal [in] Brexit, it is unclear whether the government would still implement new EU laws, such as the fifth anti-money laundering directive.”⁶⁵ One of the issues is whether to permit a “public database” which would require member states to “draw up rules to allow [only] those with a “legitimate interest” to have access to “information on a case by case basis.”⁶⁶ This is important because in order to take preventative measures, the journalists would

need access, “the directive” highlights “preventative work done by non-government organisations”⁶⁷ which may or may not have access, be considered to have a legitimate interest under the AMLD 5, in order to combat money laundering. Would journalists have access via the AMLD 5, under Brexit? We’ll see. One of the problems is that “UK ... withdr[ew] from the EU”⁶⁸ this poses a problem addressed by the “Fundamental Rights Forum” in Vienna, who spoke of the UK’s image which has been “tarnished by media outlets that have caused division.”⁶⁹ One of the EU’s Missions and “Responsibili[ties], are to get involved, and “to avoid [the] encourage[ment] [of] hate.”⁷⁰ Of importance in the Brexit debate is whether:

“Fundamental rights must be a part of public discourse in the media. They have to belong to the media. Media are also instrumental in holding politicians to account and in defining the limits of what is ‘acceptable’ in a society.”⁷¹

Is Public Access a Fundamental Right?

After Brexit, *The Guardian* states that “millions of EU citizens could find it difficult to assert their right to remain in the UK ... under Home Office rules denying them access to their

other legal entities” and that they be made “available to any member of the general public.”⁷⁸ In regards to access to public information, this requirement enables access to those who are deemed a “beneficial owner” if registered can be given access, only to “persons that file a written request.”⁷⁹

NGOs, Global Witness and Transparency International

What are NGOs? NGO’s “are private nonprofit organizations that pursue activities intended to serve the public good.”⁸⁰ Part of their responsibility is to “undertake community development to serve the needs of citizens,”⁸¹ funded by “charitable donations and voluntary service for support.”⁸² There is a growing need to help “reduce the risk of terrorist financing or abuse”⁸³ by focusing on “due diligence” as well as organizational structure, funding disbursement, and other record keeping requirements.⁸⁴ Usually when searching for “unusual or suspicious activities” there may be lacking “proper documentation,” reference checks may be required to “verif[y] the source and use of funds.”⁸⁵ Regulatory compliance needs which must be met, include: “list management, customer-centric databases/CRM needs.”⁸⁶

What is “Global Witness?” Its an “international NGO ... that works to break the links between [things such as] corruption and human rights abuses.”⁸⁷ According to Transparency

⁸⁷ [Global Witness](https://en.wikipedia.org/wiki/Global_Witness), Wikipedia, https://en.wikipedia.org/wiki/Global_Witness.

International the CPI “Corruption Perceptions Index” “reveals that a majority of countries are showing little to no improvement in tackling corruption.”⁸⁸ According to one study, keeping money out of politics has been one strategy toward lessening corruption. By “keeping big money out of politics ... to ensur[e] political decision-making serves the public interest and curb[s] opportunities for corrupt deals.”⁸⁹

Meanwhile, *Transparency International* is a “non-governmental organization based in Berlin, Germany ... founded in 1993.”⁹⁰ The primary purpose of this non-profit is to “take action to combat global corruption with civil societal anti-corruption measures and to prevent criminal activities arising from corruption.”⁹¹ Corruption can occur in different scales, “in general corruption is a form of dishonesty or criminal activity undertaken by a person or organization entrusted with a position of authority, often to acquire illicit benefit, or, abuse of entrusted power for one’s private gain.”⁹²

Which is why the EU developed the 5AMLD to “enhance transparency ... to prevent money laundering” and to “tackle financing risks linked to anonymous use of virtual currencies and of prepaid instruments by limiting the anonymity of those currencies, wallet providers, prepaid cards companies.”⁹³ Note that the “5AMLD went into effect on July 9, 2018, but the EU Member States have 18 months to comply with the new rules. That made January 2020, the deadline to implement 5AMLD.”⁹⁴

Terrorist Financing

One of the ways in which terrorist are able to finance themselves is through the use of “prepaid cards.”⁹⁵ To disable this activity in the spending ecosystem which includes the hiring of people’s to illegally finance endeavors not in accordance with a country’s financial requirements, AMLD has “lower[ed] [the standards, that is] the monetary thresholds for identifying the holders of prepaid cards to address risks linked to their use in financing terrorist activities,”⁹⁶ to include “payments carried out with anonymous prepaid cards online, that does not exceed 50 euro and “in-store use of an anonymous pre-paid card” not in excess of 150 euro. There are now “electronic data retrieval systems [which] identify natural or legal persons holding or controlling payment accounts, bank accounts, and safe-deposit boxes.”⁹⁷ One of the responsibilities of the FIU (“Financial Intelligence Unit”) to each member state of the EU is to be allowed “direct, immediate, and unfiltered access to that information.”⁹⁸ With permissions as a beneficial owner under AMLD 5, EU Member State FIUs would be able to access that information regarding each individual connected to a pre-paid card to determine risks ... there are many “high-risk third countries” to which the *European Commission* has had “strategic deficiencies in their anti-money laundering or counterterrorism regimes.” This added requirement helps the “AMLD [to] harmoniz[e] the enhanced due diligence requirements [that need to be] performed by the

companies conducting business with” other high-risk countries, or in other high risk transactions, such as the solicitation, purchase, and use of pre-paid cards.

“Money laundering exploits payment system vulnerabilities that provide criminals the opportunity to disguise both themselves and the nature of their transactions. Banking fraud groups and other criminals, as they always do, have found and begun to abuse weak links in the chains of security and oversight surrounding products with a great deal of anonymity.”⁹⁹

Virtual Currency

There has been “limited regulation and oversight” by “consumer and investors” in the virtual currency world, “outside of the online gaming community.”¹⁰⁰ They have found significant abuses with regards to virtual currencies and pre-paid cards, where “banking fraud groups ... have begin to abuse weak links in the chains of security and oversight surrounding products with a great deal of anonymity.”¹⁰¹ This is because “virtual currency ... unlike regular money is not issued or backed by any government or central bank.”¹⁰² A blockchain is like a “public spreadsheet” a public ledger that keeps track of virtual currencies in private computers

however online “public keys” unlike “private keys” can be seen on a blockchain. Note: “Cryptocurrency relies on public and private keys to transfer value from one person (individual or entity) to another, and must be cryptographically signed each time it is transferred.”¹⁰³ There has been a significant movement to use virtual currency in “digital wallets” this helps to allow convertible and nonconvertible “forms of virtual currency to be identified in publicly accessible blockchains.”¹⁰⁴ With a convertible virtual currency there is a “centralized ... administrating authority” whereas “by default, all nonconvertible virtual currency is centralized.”¹⁰⁵

The Use of Bitcoin

However vast no network is completely anonymous, not even bitcoins, which are like a virtual currency where you can “see every transaction, but not where the transaction came from or where it is going unless someone acknowledges their ownership.” A bitcoin is a convertible and decentralized meaning, it has “no central administrating authority and no central monitoring or oversight.”¹⁰⁶

The use of crypto currency for money laundering continues to be a debate, recently FINRA “US Financial Industry Regulatory Authority” issued fines for “failure to comply with AML legislation” specifically to Morgan Stanley the “38th-biggest bank in the world.”¹⁰⁷

¹⁰⁷ Simon Chandler, Crypto is Tightening Up Its Anti-Money Laundering Game, While Banks Are Still Being Fined for Non-Compliance, (January 2, 2019), <https://cointelegraph.com/news/crypto-is-tightening-up-its-anti-money-laundering-game-while-banks-are-still-being-fined-for-non-compliance>.

Meanwhile “global central bankers” have been working on how to address the regulation of digital currencies, but have yet to “reach an agreement on how to do so,” based upon the minimal risks posed to the current financial system, if they were to allow the introduction of new digital payments, expanding the world of digital payments with the implementation of the *Facebook Libra*. One concern is how “banking and financial market[s]” will be able to sustain their “intermediation” abilities under existing “deposit-taking of banks and their business models.”¹⁰⁸ To address the risks posed by cryptocurrency exchanges, where a lack of transparency exists, would be for “correspondent banks [who] handle the transactions” to be “help liable for financial crimes committed through transactions” who do not maintain accurate KYC/CDD data of wire transfers, the “Know Your Customer” requirement for bitcoin exchange and AML Compliance.¹⁰⁹

For a period it was unclear whether it would be mandated by current laws for “virtual currencies” to be regulated through a central bank. At the present moment virtual currencies exist in databases “transacted through online networks.”¹¹⁰ The Travel Rule was created by FATF, to require “member countries ... to pass customer information to each other when transferring crypto assets” like a “wire transfer ... under the Bank Secrecy Act (BSA).”¹¹¹ The new “Travel

Rule, which applies to all cryptocurrency transactions over \$1,000 threshold”¹¹² was created in response to scams, misappropriation of funds, massive losses to investors, and ponzi schemes which have “defrauded millions.”¹¹³

The Travel Rule is most similar to the Bank Secrecy Act (BSA) which subjects CVCs “Convertible Virtual Currency service providers” to regulation, while FinCEN “The US Treasury’s Financial Crimes Enforcement Network” keeps track of CVC service providers via the secure sharing of information such as found by transfers that use SWIFT messaging during exchanges of “cryptocurrency blockchains.” The Travel Rule applies to “regulatory requirements for Virtual Asset Service Providers (VASPs)” managing “cryptocurrency transactions” and monitoring “sender and receiver information” like the BSA in the US monitors “bitcoin ATMs, as well as peer-to-peer and transaction networks [which are] subject to the regulation.”¹¹⁴ Likewise cyptocurrency has emerged as a “new global currency” in blockchains introduced on social media and “other tech Titans,” these new technologies mean that a “more sophisticated AML/CTF regulation [may be necessary to] enabl[e] compliance while preserving privacy.”¹¹⁵

Since the passing of the AMLD5, “new rules require crypto exchanges and custodial service providers to register with their local regulator and demonstrate compliance [with a] “know-your-customer (KYC) and anti-money laundering AML procedures” giving “greater power and reach to financial intelligence units and law enforcement.”¹¹⁶ This law affects “EU’s

Is it Possible?, ACAMS, <https://www.acams.org/aml-white-paper-anonymity/>, or <http://www.acams.org/wp-content/uploads/2015/08/You-Think-You-Know-But-You-have-No-Idea-S-Smith.pdf>.

This brings up an important topic: anonymous use of virtual currency. When “one can get money into virtual currency systems ... anonymously” (1) an owner is not identified (2) their numbers and addresses are not identified, and (3) the countries they’re located in are not identified.¹²² Without a digital footprint, such as an IP address (“using another individual’s account”) “makes their activities difficult to trace” ... including any access to a [required] “public ledger, or blockchain ... maintained by vast identified private computer networks ... [this] makes it possible that participants... (not only abuse the power) of accessing a network - especially those networks required to maintain a ledger ... “by undoing transactions that are thought to be finalized.”¹²³

What is being done to change the current crypto-landscape, as more systems for monitoring transactions are being implemented, and required to be complied with, efforts to expand the ways in which we communicate using currency has been suggested by tech giants such as *Facebook*, who has a personal stake in the matter as an example of a “PEP politically exposed [person]”¹²⁴ who was once “vulnerable to corruption – for ongoing risks”¹²⁵ as database upon which user information could be misused to as a resource for outside use. There is an inherent need for not only the sharing of members to a transaction when it comes to cryptocurrency, to detect fraud, but also improve upon the means by which “politically exposed

persons”¹²⁶ can protect themselves and their information from being misused to facilitate corruption, that is, being used as a basis for decision making, in transactions, which they are not a party to, and then be affected by the misuse of funds, funneled to unmonitored “anti-money laundering programs.”¹²⁷

More research is needed when it comes to how money is used or misused, and how the transfer of assets should or should not benefit the recipient, especially not to criminals. Which is one reason why “Facebook” has taken on a “leadership position” to combat the use of “coin ... [to finance] terrorism ... and money laundering” in response to the “difficulty” faced by those who seek to “enforc[e] political sanctions to threats to the primacy of the US dollar.”¹²⁸ Why not a new currency, the “Libra” as suggested by Facebook to “the global financial system” in a “dark market,” with new rules likely to reduce the number of exchanges because of “FAFTF’s travel rule ... [and increased] anonymiz[ing] [of] “cryptocurrency transaction.”¹²⁹ To improve upon transfers, and at the same time mitigate rates of misuse of electronic transfers of monies in the form of cryptocurrency, Facebook envisions “a new global currency [which would be] decentralized, [a] programmable database, designed to support ... [and] serve as an efficient medium of exchange for billions of people around the world.”¹³⁰ The purpose for this “distributed technology” is to create “an open and trustworthy system” one that will not only

“enhanc[e] traditional financial systems” and “governance” but will also continue to build “safe and compliant financial applications” under the selective oversight of “Association Members.”¹³¹

How this new network will operate, has yet to be realized, cryptocurrency will be again discussed July 2020, as Facebook is scheduled to appear at a hearing by “The House Financial Services Committee and the Senate Committee on Banking, Housing and Urban Affairs.”¹³²

How does the AMLD 5 Play a Role in Virtual Currency

One of the responses “at the European level” to virtual currencies were three measures undertaken by the “European Banking Authority (“EBA”) to “address the risks of virtual currencies.”¹³³ These measures, trace the “creation/licensing of a ‘scheme governance authority’ to challenge the “integrity” of the virtual currency as well as trace “extensions” which are difficult, because anonymous “of market abuse and AML rules to virtual currency transactions; [and to support] the enactment of specific rules of conduct for market participants.”¹³⁴

“Money laundering and terrorist financing purposes” are arguably the “biggest threa[t] associated [to] virtual currenc[y] (or cryptocurrency[y]) use.”¹³⁵ This is important because the “means of exchange ... [to] which [a currency] can be transferred, stored and traded

electronically” will be changing after Brexit, and new permissions required.¹³⁶ There are certain “virtual currency exchange platforms” which are used to trace virtual currencies, and there are certain “firms designated as obliged entities under EU Law, including credit institutions, financial institutions and certain professionals such as auditors and accountants.”¹³⁷

Virtual Currency: Response by the EU (Effects on Tech)

After Brexit new AML 5 laws will require the UK to abide by EU laws. As an “EU Member State ... the UK is part of a collaborative fight against money laundering and financial crime,” making it more difficult for people in Tech to work in the UK, which used to be a leader or hub, changes to laws will cause the moving of jobs to Europe, to make it more difficult for financial crimes to occur.¹³⁸ The EU has therefore created a “Europol Information System (EIS), [which would] enabl[e] law enforcement from different countries within the EU to exchange criminal intelligence” such as virtual currency exchanges, however even then “[with] best practices ... [and] the right agreements put in place. The UK government must ensure the highest standards ... and sustain the importance of implementing effective AML systems.”¹³⁹

Preventing the usage of “virtual currencies [from] abus[e]” ... will require changes to the current anonymity to which terrorist are able to conceal transactions, this is due to the “lack of an

EU-level reporting mechanism for identifying suspicious activity.”¹⁴⁰ According to the MLD5, FIU’s “should be able to obtain information” that would allow them to identify the owner and “associate [the] virtual currency address” to that virtual currency.¹⁴¹

UBO’s and High Risk Third Countries

Another system put in place are UBOs (Ultimate Beneficiary Owners) ... which helps to “collaborat[e] data, [which] reduces the number of shell companies in an attempt to prevent illicit behavior by making businesses more transparent.”¹⁴² This would make it difficult for “criminals to continue to benefit from their crimes.”¹⁴³ (See above “*Terrorist Financing*”).

There are many high-risk third countries, which are prohibited from joining the EU under this new directive AML 5, and the scope of “identifying” high risk countries has since been broadened.¹⁴⁴ Whereby many risks “stemming from ... shell companies and opaque structures ... [are] used by criminals and terrorists to hide the real beneficiaries of a transaction, including for tax evasion purposes.” A *shell company* is an “inactive company [that] use[s] as a vehicle for various financial maneuvers or kept dormant for future use in some other capacity.”¹⁴⁵ Under the AMLD 5 *high-risk third countries* are identified by:

sanctions” to freeze assets, and “close the gaps in the EU system.”¹⁵⁷ TFS stands for “targeted financial sanctions” which have the ability to freeze “terrorist related assets pursuant to both UNSCR regimes,” sanctions are applied where there is a breach of these requirements, and where there are “weaknesses in supervision,” UK has one of the most “robust confiscation regime[s] applying both “criminal and civil measures to deprive terrorists of their assets.”¹⁵⁸

In responding to this “overlap between money laundering and terrorist financing” enhanced due diligence procedures have required the UK to participate in the NCA’s “Flag It Up campaign, “which focuses on the social impact of money laundering ... [and] urges those in the sector to file suspicious activity reports directly with the NCA.”¹⁵⁹

‘Rules and regulations can make crimes like money-laundering seem distant, and removed from everyday life. Compliance can become just a tick-boxing exercise,’ says Philippa Foster Back CBE, Director for the Institute of Business Ethics (IBE).”¹⁶⁰

There are (CDD) Client Due Diligence “reporting and monitoring requirements under the regulations” set by the “Money Laundering Regulations 2017 in the UK, and to help IFA members checklists have been made available to them. The checklists help with “policies, controls and procedures, awareness and training, record keeping, firm’s risk assessment of money laundering or terrorist financing, CDD, reporting, supervision, and monitoring.”¹⁶¹

Compliance (and Due Diligence)

Wherever there are “high-risk third countries on the list” There are a “series of checks and balances that financial institutions must use where there’s a high risk of money laundering or terrorist financing.”¹⁶² These checks and balances including a finding of:

“(1) additional information on the customer and on the beneficial owners, (2) additional information on the intended nature of the business relationship, (3) information on the source of funds and source of wealth of the customer and of the beneficial owners, (4) obtaining information on the reasons for the intended or performed transactions, (5) the approval of senior management for establishing or continuing the business relationships, and (6) conducting enhanced monitoring of the business relationship by increasing the number and timing of controls applied and selecting patterns of transactions that need further examination.”¹⁶³

Whenever “tackling money laundering” not only is an “enhanced level of scrutiny required for all business relationships ... essential to identify and mitigate any potential risks” but also ... “essential to have increased transparency to deter and identif[y] illegal activity.”¹⁶⁴

Banking in the US and Tech

In the US the Federal Reserve System, FinCEN and the OCC have made a coordinated effort to “strengthen the financial system against illicit financial activity.”¹⁶⁵ Banks have been encourage to be “innovative” while complying with “BSA/AML requirements.”¹⁶⁶ They have even encouraged the implementation of “AI-based transaction monitoring systems to identify suspicious activity,”¹⁶⁷ during the testing of new technologies, leniency has been requested for where existing processes have not been sufficient, improved upon. Without “automatically assume that the banks’ existing processes are deficient,” “FinCEN [will] consider requests for exceptions and exemptions for the testing and potential use of new technologies.”¹⁶⁸

One of the innovative ways in which “complex regulatory” requirements have been improved, in a “dynamic and fast moving” period of risk, while reporting “suspicious transactions” has resulted in the implementation of “AI” i.e. new technologies combined with “human-expertise” to ensure less “exposure to risk, fines and reputational damage” through the use of RPAs “machine learning and robotic process automation” which scores, alerts, and monitors workflows, which can be calculated through an automated system prior to “mak[ing] ... [a] final decision.”¹⁶⁹ For example, there are “human-guided ... and unsupervised machine learning” which can not only “identify known risk scenarios” but also maintains “predictive” powers for use in the analysis of “analytics” which lend insight to the “discovery of previously

unknown money laundering risks” through the assessment of “relationships” between “entities ... [while] meet[ing] compliance regulations.”¹⁷⁰

Providing a more “cost-effectiv[e]” system that “eliminates the need for redundant hardware and other costly IT modules” can help in the avoidance of clerical errors or decisions made based on “false positives” by a more “intuitive” based approach of analyzing “insights” with an “entity-centric view,” that can continuously be “test[ed], [and] tune[d],” to further improve upon the weighing of responsibilities of financial institutions to minimize time wasted through “more accurate detection analytics.”¹⁷¹ When a system is “agile enough to detect fast changing risk scenarios” between both banking and non-banking institutions, this establishes a more reliable methods of setting priorities of focus upon evaluating a “complete system [of] transparency for teams and regulators,” thus “establish[ing] standard processes” which not only improve but “empower” AML productivity.¹⁷²

Banks that work on a check-based system, where manual review is used to monitor “high-risk transactions and accounts” -many of these systems have proven to be inefficient, which is why the US Banking system has “expanded the ranks of its compliance team.”¹⁷³ As “regulators continu[e] [to] revise [their] rules ... focus expand[ing] from organized crime to

terrorism” is being used to “target[t] individual countries and even specific entities as part of their foreign policies.”¹⁷⁴

Banking in the UK and Tech

In the age of technology, with an ability to “send money to another bank in real time ... criminals have been quick to exploit these innovations.”¹⁷⁵ According to “The City of London Police’s National Fraud Intelligence Bureau (NFIB) over £32 million has been reported to be lost as a result of CEO fraud alone. Organisations in both the UK and the US have experienced losses of thousands to millions of dollars/pounds.”¹⁷⁶ Today, over “90% of UK current accounts are ... covered by” Pay.UK, who now has an ability to track down these illegal payment networks, set up by criminals to transfer funds, and investigate in detail exactly how the monies have been stolen and the means by which those “illicit funds [have been] dispersed across a network.”¹⁷⁷ This new system of tracking by MITS “Mule Insights Tactical Solution ... underpinned by Vocalink’s Anti-Money Laundering (AML) Insights solution” pinpoints not only “suspected illegal activities,” but can also track “suspicious payments” between multiple accounts “within the same or different financial institutions.”¹⁷⁸

In addition to those measures, UK “member states” will be required to follow EU laws following their exit from the EU. Why upon leaving the EU, does UK still have to abide by EU

The Anti-Money Laundering Act 2018 (SAML 2018)

The “Sanctions and Anti-Money Laundering Act 2018 (SAML 2018) is enabling legislation to allow the UK to impose economic and other sanctions, and money laundering and terrorist financing regulations, after the departure from the EU.”¹⁸⁶ However, even after the UK’s departure from EU, they have vowed to “continue to work together on AML issues after Brexit,” including compliance with the MLD5, even though deadlines for implementation have not been set.¹⁸⁷ The UK has even “proposed [to] tight[en] up MLR 2017 ... [and expand] ... the range of businesses” they will apply to areas such as “the virtual or crypto-currencies sector,” as discussed above, in response to growing concerns when it comes to banking and tech.¹⁸⁸

Brexit, FIUs, and Request to Obtain Information

One of the biggest changes occurring after Brexit and the AML 5, are the “new powers for financial intelligence units ... [and the affect that has had on their] power to request obtain and use information from any obliged entity based on their own analysis and intelligence which used to be “triggered [only] by a prior suspicious activity report.”¹⁸⁹

All participating countries have been affected by the passage of AML 5, to which they are required to be complaint to, and based on whether or not they are considered a high-risk third country, different rules may apply. Similarly, the passage of new laws in other countries, who are

AML 5 complaint, requires “member states to establish centralized registers or data retrieval systems to enable financial intelligence units and national competent authorities to access information about the identities of holders of bank and payment accounts and safe-deposit boxes.”¹⁹⁰

Beneficial Ownership

Denmark was one of the first counties to implement a published register of company shareholders, under the required under *Article 30*, which requires the reporting of beneficial ownership made available to “competent authorities (e.g. financial intelligence units).”¹⁹¹ Company online databases are primarily responsible for the recording of PSCs (People of Significant Control) who meet the criteria, either directly or indirectly holding more than 25% of the shares to a company.¹⁹²

Article 31, under the AML 5 directive “requires trustees to ‘obtain and hold adequate, accurate and up-to-date information on beneficial ownership regarding the trust.’”¹⁹³ Whereby “the protector (if any), beneficiaries or class of beneficiaries, and any other person exercising control over the trust”¹⁹⁴ is required to include such information “on a central register of

trusts.”¹⁹⁵ The “HMRC” is one of the “competent authorities” responsible for maintaining a register, however “the UK has no plans to make this information available to the public.”¹⁹⁶

There’s a difference between “companies and trusts” argues *UK Prime Minister David Cameron*, he highlighted the necessity for a solution to “addres[s] the potential misuse of companies, such as central public registries” arguing that it is not appropriate.¹⁹⁷ Trusts on the other hand, require different treatment, where the implications for privacy are “far greater.”¹⁹⁸ *Lord Newby* argues that where there has to be more than a mandatory registration requirement, claiming it to be “disproportionate [in its] approach ... [and] undermines the common-law basis of trusts in the UK.”¹⁹⁹ The purpose of a registration requirement would be to limit “legal arrangements” to “certain trusts [with] a legitimate interest” to determining “beneficial owner[s]” to any “information accessible to persons [or] organisations” who claim to have a “legitimate interest” to “assess the conditions and technical specifications” by which any establishment of “registers of trusts (and companies)” who’s interconnection either imposing or not imposing “data protection and privacy requirements” will suffer “tax consequences.”²⁰⁰ Since the passing of the EU’s “accelerat[e] implementation of the 4th AMLD in 2017, “the EU has taken [an] international lead ... with regard to [the importance of] information sharing.”²⁰¹ This is a very

“complex task” especially when “confronted with data protection and privacy requirements.”²⁰²

In fact one citizen in France argues that “the publication of her personal data infringed on the right to a private life.”²⁰³

AML Compliance in the US

FATF stands for The Financial Action Task Force, an “intergovernmental organization” who serve as “gatekeepers ... who are in a position to facilitate or inhibit money laundering and terrorism financing.”²⁰⁴ FATF assists with the monitoring of “soft-law developments,” to encourage “U.S. legal professionals to follow” in response to new regulations, applicable to English speaking countries, where FATF exists, “endorsed by more than 180 jurisdictions, the World Bank and the International Monetary Fund.” FATF’s current objectives are:

“1) revising and clarifying the global standards for combating money laundering and terrorism financing; 2) promoting global implementation of its standards; 3) identifying and responding to new money laundering and terrorist financing threats; and 4) engaging with stakeholders and partners throughout the world.”²⁰⁵

According to *FATF* “the greatest risks should receive the most attention.”²⁰⁶ Their guides use a “risk-based approach” which is “founded on the premise that there are finite resources

available to combat money laundering and terrorism financing ... [to] be used in the most efficient manner possible.”²⁰⁷

The 2008 Lawyer Guidance, identifies three different kinds of risk factors: client risk, and service risk.²⁰⁸ STR is a recommendation, not required, but up for later discussion, upon agreement by FATF and legal professionals, not designated as “truly [a] part of a risk-assessment process.”²⁰⁹ STR stands for “suspicious transaction reporting” which is a “risk-based approach for the financial sector and those other sectors includ[ing] a number of provisions.”²¹⁰ AML is not limited to legal professionals alone, who may be “subject to universal criminal liability, when acting as a notary public or as a financial or corporate broker, [as well as] disciplinary rules designed specifically for legal professionals and administered by regulatory bodies.”²¹¹

AML Compliance in the UK versus the US

The AML/CFT “legislation implemented [in] the EU’s money laundering directives ... were based in large part of the FATF recommendations.”²¹² Risk assessment by the U.S. and U.K. are very similar, having expressed a consolidated effort to “provide a stronger understanding of how two leading economies [can] better identify, analyze, and mitigate the challenges that they face.”²¹³ According to FATF, when the two nations adhere to a “risk-based approach” while noting both “similarities and differences” this can improve their ability “to view

affiliated with a charitable organization” which were not included in the “U.K. Report.”²¹⁹ In addition both the US and the UK reports discussed beneficial ownership, “a beneficial owner is [an] individual who owns or controls a bank account.”²²⁰ The UK focused on the many threats posed by “money laundering” and that such “arrangements ... [could be] made [through] companies, trusts, and partnerships with hidden owners.”²²¹

The US recently signed a *G-20 Beneficial Ownership Action Plan*, which mentions risk assessments to be undertaken by *The White House* through its “renewed commitment to advocate for comprehensive legislation to impose a beneficial owner requirement.”²²² One political issue raised is whether “stronger requirements would undermine client confidentiality ... [which] state-level officials claim collecting the information would be burdensome.”²²³

“AML and CFT ris[k]” reports have been evaluated by both the “US and the UK.”²²⁴ The UK questioned “whether government regulation was necessary” and by March 2015 decided that there was a ““strong case” for introducing AML regulations.”²²⁵ The UK report found the current

risk to be low, when it comes to “money-laundering [and] virtual currencies.”²²⁶ “The Report concluded that criminals ... were not currently using virtual currencies to raise funds, pay for infrastructure or move money into and out of the country.”²²⁷ Those who use digital currency also known as money transmitters are “obligate[d] ... to comply with the AML and CFT regulations.”²²⁸ While the US is “ahead of the UK in terms of regulating digital currencies” there is still more work to be done, “according to the US money laundering report.”²²⁹

Money Laundering in the UK – Prosecuting Offences

In the UK money laundering offences are “investigated by the National Crime Agency (NCA) and the police and Her Majesty’s Revenue and Customs (HMRC).”²³⁰ As a general rule, the “Crown Prosecution Services” prosecute offences, and those “cases involving serious fraud or corruption” are investigated by the “Serious Fraud Office.” Overall the “Financial Conduct Authority (FCA)” has the power to investigate and prosecute offences under POCA.²³¹ POCA applies whenever there is “money laundering [that] has taken/is taking place in another jurisdiction” such as outside of the UK, such criminal conduct is punishable upon “disclosure [of the] offence under POCA. While “dishonesty” is “not required” to prove the commission of an

offence, others defences to “money laundering” will be evaluated under POCA 2002, concerning the “appropriate consent to transaction[s]” as well as any “reasonable excuse[s] for not making a disclosure” whenever “the relevant conduct” in question is found to have “occurred outside of the UK” and meets the criteria of what is considered a “unlawful [activity] at the time in the territory,” provided that “the elements of each of the principal offences and the defences [are made] available” for evaluation.²³² POCA may also apply to “criminal conduct” occurring in the UK, and meets the required elements, wherever there is “failure to disclose knowledge or suspicion (or where there were reasonable grounds for knowing or suspecting” that too may give rise to an offence under POCA.²³³

On the other hand, a money laundering offence is not considered punishable if occurring within or outside the territory of the UK, and if the relevant conduct when it occurred was not unlawful under criminal law that applies to that country or territory, if at the time of the offence reasonable grounds were held to believe the conduct occurred outside of the UK or in another country, thus counting as an “overseas conduct defenses, in relation to the disclosure offences.”²³⁴ It’s important to remember that: POCA applies only to “prescribed persons” covered by “SARs compliance regulations concerning “lawful disclosures” in the event that “information contained” within those reports concerning persons as defined under POCA, will be “used by authorities to pursue further inquiries and investigations ... [with the potential to] lead to the prosecution of wrongdoers.”²³⁵ Then POCA would not apply, or be used in those cases to

prosecute. -Both individuals and corporations can be prosecuted for money laundering. In fact, most “offences in POCA apply to corporations as well as individuals.”²³⁶

Furthermore, the HMRC “is a supervisory body for Money Laundering Regulations” in the UK.²³⁷ It’s a “non-ministerial department of the UK Government responsible for the collection of taxes, the payment of some forms of state support and the administration of other regulatory regimes including the national minimum wage.”²³⁸ This is to ensure that people do not cheat the system. HMRC is a leader “on policy maintenance and policy development.”²³⁹

New AML Laws in the UK 2017

New as of 2017, are The Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017 (MLR 2017)²⁴⁰ The purpose of these regulations are to provide for some “written assessment of money laundering risk and prescribe ... internal controls.”²⁴¹ These new regulations not only enable written assessments but also encourage due diligence on the behalf of compliance officers, including the requirement to specify beneficial ownership that trusts provide.²⁴²

²³⁶ Joel M. Cohen, Stephanie Brooker, Anti-Money Laundering Laws and Regulations 2019, ICLG, (September 5, 2019), <https://iclg.com/practice-areas/anti-money-laundering-laws-and-regulations/uk>

“The principal AML requirements are contained in the MLR 2017 ... require relevant persons to, among other things, carry out appropriate levels of risk assessment, implement adequate policies, controls and procedures, and carry out appropriate levels of customer due diligence (CDD).”²⁴³

There are penalties for failure to comply with MLR 2017, which include failure to: “(1) carry out risk assessments, (2) apply policies and procedures, (3) appoint a nominated officer, (4) keep required records, (5) apply customer due diligence measures when required, (6) conduct ongoing monitoring of a business relationship; and (7) take additional measures in relation to a Politically Exposed Person (PEP).”²⁴⁴

Overall the MLR 2017 encourages “relevant persons ... to adopt a more risk-based approach towards anti-money laundering [with regards to how they] conduct due diligence.”²⁴⁵ Relevant persons, may also include “gambling providers” in addition to “trustees [with a] greater obligation [for] transparency of beneficiaries in their trusts.”²⁴⁶ The purpose for the MLR 2017, is to provide a system or procedure for which relevant persons can produce a “written AML risk report [to] address[s] its customers, countries of operation, products and services, transactions, [and] delivery channels.” Meanwhile, depending on the “size and nature of the business” they may also be required to create “written policies” to “identify risks ... [as well as] repor[t], [and

which will be used in the delivery of the government’s commitment to deepen partnerships with the private sector.²⁵² The purpose of this organization is to “investigate and penalize,” while strengthening cooperation following the expansion of “law enforcement powers through the Criminal Finances Act” which helped to update the Money Laundering Regulations, which have helped to set international standards, “rais[ing] awareness of financial crime and how to guard against it.”²⁵³

The History of AML in the US

AML stands for Anti-Money Laundering. There are three stages: placement, layering, and integration.²⁵⁴ “Placement is the movement of cash from its source ... [which] can be easily disguised or misrepresented.”²⁵⁵ This occurs by putting back into the “financial system” monies to appear clean, “sometimes through the wiring or transferring [of money] through numerous accounts.”²⁵⁶ The Bank Secrecy Act (BSA) was created in 1970 and is administered by the Financial Crimes Enforcement Network, in the US, “provid[ing] law enforcement and regulatory agencies with the most effective tools to combat money laundering.”²⁵⁷ The BSA has since been “enhanced and amended.”²⁵⁸ The Bank Secrecy Act included: (1) the establishment of requirements for recordkeeping and reporting by private individuals, banks, and other financial institutions; (2) Designed to help identify the source, volume, and movement of currency and

other monetary instruments transported or transmitted into or out of the US or deposited in financial institutions; (3) and Requires banks to (a) report cash transactions over \$10,000, using the Currency Transaction Report, (b) properly identify persons conducting transactions; and (c) maintain a paper trail by keeping appropriate records of financial transactions.²⁵⁹

AML Enforcement in the US

It is a crime to engage in “any type of financial transaction [where there is] ... knowledge that the funds were proceeds of “criminal activity.””²⁶⁰ AML/CFT laws are specifically designed to combat the financing of terrorism. The following laws pertain to anti-money laundering: (1) Money Laundering and Financial Strategy Act 1998, (2) USA Patriot Act 2001, (3) Suppression of the Financing of Terrorism Implementation Act 2002, and (3) Intelligence Reform and Terrorism Prevention Act 2004.²⁶¹ Legislation, such as the Bank Secrecy Act “appl[ies] to “financial institutions,” [such as] ... banks, broker-dealers, casinos, futures commissions merchants, money services business, mutual funds and other persons.”²⁶² Although there are “criminal prohibitions on terrorism financing [to individuals]. Legal entities [can] be held liable for violations of the Bank Secrecy Act.”²⁶³

AML/CFT laws are “extraterritorial.” Meaning the laws apply to activities conducted “in, with, or involving the United States.”²⁶⁴ International agreements, or “multilateral agreements”

that “include AML/CFT provisions Facilitate [both the] exchange[e] of banking and other financial records [as well as] in money laundering cases involving other countries.”²⁶⁵

The Financial Crimes Enforcement Network (FinCEN) “issu[es] and enforce[es] regulations with respect to AML/CFT laws ... facilitate[ing] [the processing of] information sharing among law enforcement agencies and the federal financial regulatory authorities.”²⁶⁶

With regards to compliance, FinCEN 314 list, 314(a), “enables law enforcement to solicit information from financial institutions related to such investigations.”²⁶⁷ There are three elements to making a FinCEN list, executed by Federal, state, local, and foreign law enforcement: (1) the sending of requests for information regarding subjects suspected of terrorism or money laundering, (2) the review of requests every two weeks, sent via a secure internet website to financial institutions across the country, and (3) the prompt search by financial institutions of their entire customer database for any accounts maintained within the last 12 months and any transactions conducted within the last 6 months by named subjects on the list.²⁶⁸ The primary purpose of maintaining a FinCEN list is to “enhance law enforcement’s ability to identify FinCEN sanctioned countries and fight terrorism and money laundering.”²⁶⁹

The Bank Secrecy Act

FinCEN is a “bureau within the Treasury Department” responsible for “implement[ing], administer[ing], and enforce[ing] compliance with authorities by what is “known as the Bank Secrecy Act [“BSA”].”²⁷⁰ The BSA provides the “legislative framework” for preventing money laundering, and is also known as “The Currency and Foreign Transactions Reporting Act of 1970,” and “sometimes referred to as an “anti-money laundering” law (“AML”) or jointly as “BSA/AML.””²⁷¹

In order to enforce violations, The Bank Secrecy Act relies upon a “BSA E-Filing System in order to submit Suspicious Activity Reports.”²⁷² The Bank Secrecy Act governs the activities of financial institutions, who are “required to assist U.S. government agencies in detecting and preventing money laundering.”²⁷³ Under this act, financial institutions are required to: (1) “keep records of cash purchases of negotiable instruments,” (2) file reports of cash transactions exceeding \$10,000,” and (3) “report suspicious activity that might signal criminal activity.”²⁷⁴ The BSA also includes a “provision of the USA Patriot Act, which requires every bank to adopt a customer identification program.”²⁷⁵ Financial institutions include: “national banks, federal savings associations, federal branches, and agencies of foreign banks.”²⁷⁶

²⁷⁰ FinCEN’s Mandate From Congress, 31 U.S.C. 310, <https://www.fincen.gov/resources/fincens-mandate-congress>.

²⁷³ Suspicious Activity Reports (SAR), Office of the Comptroller of the Currency, (April 1, 2013), <https://www.occ.treas.gov/topics/bank-operations/financial-crime/suspicious-activity/index-suspicious-activity.html>.

²⁷⁴ Suspicious Activity Reports (SAR), Office of the Comptroller of the Currency, (April 1, 2013), <https://www.occ.treas.gov/topics/bank-operations/financial-crime/suspicious-activity/index-suspicious-activity.html>.

²⁷⁵ Suspicious Activity Reports (SAR), Office of the Comptroller of the Currency, (April 1, 2013), <https://www.occ.treas.gov/topics/bank-operations/financial-crime/suspicious-activity/index-suspicious-activity.html>.

²⁷⁶ Bank Secrecy Act, Office of the Comptroller of the Currency, <https://www.occ.treas.gov/topics/supervision-and-examination/bsa/index-bsa.html>.

Under the Bank Secrecy Act (BSA), banks are required to:

- “Establish effective BSA compliance programs
- Establish effective customer due diligence systems and monitoring programs
- Screen against Office of Foreign Assets Control (OFAC) and other government lists
- Establish an effective suspicious activity monitoring and reporting process
- Develop risk-based anti-money laundering programs”²⁷⁷

The OCC

The OCC “conducts regular examinations of” these financial institutions “to determine compliance with the BSA” in the US.²⁷⁸ There are alert systems, advisories, and rulemakings provided by the US Department of Treasury, who along with the OCC determine “who may be engaged in fraudulent activities” as well as find those “deemed to be of high-risk for money laundering or terrorist financing activities.”²⁷⁹ There are BSA/AML risk management programs, which are supported by US law enforcement who “provid[e] banks with access to resources and tools” to help them with the “fil[ing] [of] money laundering and terrorist financing investigations.”²⁸⁰ They are responsible for “provid[ing] the requisite notices to law enforcement to deter and detect money laundering, terrorist financing and other criminal acts and the misuse of our nation’s financial institutions.”²⁸¹

What is AML, and the 5 Pillars

In the US, there are 5 pillars governing AML “Anti-Money Laundering” and BSA Compliance under FinCEN, the most recent pillar being “the establishment of a risk-based, customer due diligence procedure.”²⁸² The “Bank Secrecy Act compliance program (collectively “AML”) rests upon four pillars: (1) written policies and procedures; (2) a designated AML compliance officer; (3) independent testing of the institution’s AML program; and (4) implementation of an adequate employee training program.”²⁸³ This new rule not only amends the “Bank Secrecy Act ... effective July 2016, [but also required full compliance] by May 11, 2018.”²⁸⁴

At a minimum a proper BSA/AML program must include the following:

- A system of internal controls to ensure ongoing compliance;
- Independent testing of BSA/AML compliance;
- The designation of an individual responsible for day-to-day compliance; and
- Training for appropriate personnel.²⁸⁵

²⁸² Stuart P. Lott, The “Fifth Pillar” of AML/BSA Compliance FinCEN Issues Final Rule for New Customer Due Diligence Requirements under the Bank Secrecy Act, Bradley, (July 20, 2016), <https://www.financialservicesperspectives.com/2016/07/the-fifth-pillar-of-amlbsa-compliance-fincen-issues-final-rule-for-new-customer-due-diligence-requirements-under-the-bank-secrecy-act/>.

²⁸³ Stuart P. Lott, The “Fifth Pillar” of AML/BSA Compliance FinCEN Issues Final Rule for New Customer Due Diligence Requirements under the Bank Secrecy Act, Bradley, (July 20, 2016), <https://www.financialservicesperspectives.com/2016/07/the-fifth-pillar-of-amlbsa-compliance-fincen-issues-final-rule-for-new-customer-due-diligence-requirements-under-the-bank-secrecy-act/>.

²⁸⁴ FinCEN Adds Fifth BSA Compliance “Pillar.” The NCUA Report National Credit Union Administration, <https://www.ncua.gov/newsroom/ncua-report/2017/fincen-adds-fifth-bsa-compliance-pillar>.

²⁸⁵ FinCEN Adds Fifth BSA Compliance “Pillar.” The NCUA Report National Credit Union Administration, <https://www.ncua.gov/newsroom/ncua-report/2017/fincen-adds-fifth-bsa-compliance-pillar>.

The purpose behind the fifth pillar, implemented by FinCEN, the US Treasury Department Financial Crimes Enforcement Network, is to impose a “new requirement” that requires “banks, broker-dealers, mutual funds, futures commission merchants, and brokers in commodities” to “identify and verify the identity of the natural persons behind the legal entity customers – [i.e] the beneficial owners.”²⁸⁶ FinCEN provided a “two-year implementation period.”²⁸⁷ So that whenever “an account is opened by a new or existing legal entity customer” the financial institution would have to identify its true owners based upon the following criteria, which would include anyone who owns 25% or more equity interest either directly or indirectly, or includes any individual who has a “significant responsibility to control, manage, or direct a legal entity customer Who regular performs similar functions.”²⁸⁸

In order to identify the beneficial owners a CIP Program, has been established to “verify the identity of individual customers under the financial institution’s customer identification program (CIP).”²⁸⁹ Whereby financial institutions are required to “verify that information using reasonable and practicable risk-based procedures.”²⁹⁰ Factors involved in this process, require examination of the “reliability of the information” to make sure a true and accurate identification

²⁹⁰ Stuart P. Lott, The “Fifth Pillar” of AML/BSA Compliance FinCEN Issues Final Rule for New Customer Due Diligence Requirements under the Bank Secrecy Act, Bradley, (July 20, 2016), <https://www.financialservicesperspectives.com/2016/07/the-fifth-pillar-of-amlbsa-compliance-fincen-issues-final-rule-for-new-customer-due-diligence-requirements-under-the-bank-secrecy-act/>.

of the beneficial owners, and if necessary determine whether a financial institution must rely on a financial institutes “affiliates” to identify and verify a legal entity’s beneficial owners. Entities excluded from this fifth pillar, include “entities registered with the SEC or the CFTC,” insurance companies, non-US financial institutions established in jurisdictions who’s regulators maintain beneficial ownership information, and non-US governmental entities engaging in non-commercial activities.”²⁹¹ Furthermore, “CIP procedures and risk-based monitoring [have been used] to identify suspicious transactions.”²⁹² However there are deficiencies to these programs ability to adhere to BSA/AML regulatory requirements. Under the new CDD rule, each financial institution must not only review new account policies and procedures, updating them with the new beneficial ownership identification requirements, but they must also determine the beneficial owners i.e. the current legal entity customers, as well as ensure compliance with all “CIP, CDD. And risk-based monitoring requirements.”²⁹³

AML Compliance in the US

According to the “Paris-based Financial Action Task Force (FATF), which sets international anti-money laundering (AML) standards” rated the US as having the “lowest possible ratings for preventing criminals from laundering money using shell companies, and the

partners.”³⁰⁶ According to FATF the “US [is] non-compliant, [receiving the] lowest rating, tied to beneficial ownership and oversight as designated non-financial business, such as those involved in company formation.”³⁰⁷ It seems as though it doesn’t matter that the “US Treasury finalized rules requiring banks to request and capture beneficial ownership details at account opening, but institutions have no way to verify what they are told.”

How Does AML in the US Work?

The basic tenants of an AML compliance program under FINRA 3310.³⁰⁸ Along with compliance with the Bank Secrecy Act and the implementation of “Anti-Money Laundering rules” the primary purpose of AML is to “detect and report suspicious activity” such as “securities fraud and market manipulation.” Under FINRA 3310, AML compliance may include the following: an approved program, reasonably designed to detect and report suspicious activity, reasonably designed to achieve compliance with the AML rules (including “a risk-based customer identification program (CIP) that enables firms to form a reasonable belief that it knows the true identity of its customers,”³⁰⁹ that can be “independently tested to ensure proper implementation of the program,” that requires “each FINRA member firm to submit contact information for its AML Compliance Officer through the FINRA Contact System (FCS), and requires “ongoing training [be conducted] and provided to appropriate personnel.”³¹⁰

³¹⁰ Anti-Money Laundering (AML), <https://www.finra.org/rules-guidance/key-topics/aml>.

There are four pillars to an effective AML program.

- (1) Development of internal policies, procedures, and related controls.
- (2) Designation of a compliance officer.
- (3) A thorough and ongoing training program.
- (4) Independent review for compliance.³¹¹

In addition, there are CDD compliance measures, some of which have been added recently. CDD, is “Customer Due Diligence” which is “the process ... [by which] relevant information about the customer is collected and evaluated for any potential risk for the organization or money laundering/terrorist financing activities.”³¹²

AML Compliance in the UK

In recent news, the UK has been criticized as “professional enablers,” a system which is “highly fragmented.”³¹³ -Whereby “80% ... lack appropriate governance arrangements to tackle dirty money” their primary government sponsored source OPBAS, oversees 22 professional bodies, “and meant to ensure consistent supervision among the bodies,” however not only do they (1) “fail to gather full basic information on members (as a first step)” but they also (2) do not undertake any form of money laundering supervision at all.³¹⁴ -The “Celmenti reforms in 2006 demanded legal bodies separate their regulatory and other functions” however that has yet

to take place among the accountancy professions, an “overlap” was found by “62% of accountancy trade associations ... between their lobbying and regulatory functions.”³¹⁵ Currently, the “Institute of Chartered Accountants in England and Wales Oversee money laundering rules for accountants.”³¹⁶

The UK is a “global leader in promoting corporate transparency and it is using the results of its risk assessment to further strengthen the reporting and registration of corporate structures.”³¹⁷ At the “UN and EU level” the “UK has been highly effective in investigating, prosecuting and convicting a range of terrorist financing activity ... tak[ing] on a leading role in designating terrorists,” as well as “target[ing] financial sanctions ... domestically.”³¹⁸ Note that “the UK was one of the first jurisdictions to introduce a public register of company beneficial ownership and a register of trusts with tax consequences, going well beyond FATF’s own recommendations in some respects.”³¹⁹ UK is “one of two countries” to be “fully compliant with its beneficial ownership recommendations ... [and] meet that standard.”³²⁰

AML in the UK v. US – Primary Differences

The “international AML standard-setter” is the “Financial Action Taskforce (FATF).”³²¹ FATF is responsible for assessing the “United Kingdom’s anti-money laundering and counter

terrorist financing (AML/CFT) system.”³²² The UK is “one of the largest financial services provider in the world.”³²³ As such, through a series of public-private partnerships, as well as the implementation of “AML/CFT polices, strategies and proactive initiatives” the UK has been able to combat money laundering “achieving 1400 convictions each year,” that includes utilizing tools to “obtain beneficial ownership and other information,” despite needing to modernize and increase “its resources and the[ir] suspicious activity reporting.”³²⁴

However, the UK has a “multiplicity of players involved in AML supervision.”³²⁵ In the UK’s “regulated sector” there are several components to “an effective anti-money laundering (AML) program.”³²⁶ Its important to note that the quality of intelligence determines the pace at which those “operating on the coalface” can determine whether there has indeed been a violation. Within the “regulated sector” there are several internal controls which have been set up to control and “identify suspected money-laundering.”³²⁷ First off, all suspected money-laundering reports must be sent to the UK’s financial intelligence unit (FIU) in the dorm of a

suspicious activity report (SARs).”³²⁸ Its not just be chance that these crimes are reported, and many report are due to simple adherence to “doing the right thing,” however in “non-financial sectors” the same is not true, in fact such “patchy ... reporting” has been complained about by the government, and states that there is a need for a “credible deterrent” to help “drive widespread compliance with AML regulations.”³²⁹

Improving standards “in AML supervision” required the UK to implement another body of legislation, the “Office for Professional Body Anti-Money Laundering Supervision (OPBAS), based within the Financial Conduct Authority (FCA)”³³⁰ As stated earlier, quality intelligence has been needed, and one thing OPBAS does is that it helps to “improve[s] consistency of professional body AML supervision in the accountancy and legal sectors.”³³¹ There are “22 professional body supervisors on the one side and three statutory supervisors.”³³² The three statutory supervisors are “the Financial Conduct Authority, HM Revenue and Customs (HMRC), and the Gambling Commission.”³³³ OPBAS has the power to not only enable regulations, but

³³³ Helena Wood, Supervising the UK AML Supervisors: The Office for Professional Body Anti-Money Laundering Supervision First Annual Report, Centre for Financial Crime and Security Studies, (March 29, 2019),

also has the power to offer some direction, “official direction,” when it comes to “publicly censur[ing] a professional body supervisor ... ultimately, to recommend to HM Treasury that they consider removing the supervisor’s AML role.”³³⁴

According to the OPBAS Annual Report: “80% of professional body supervisors lacked adequate governance arrangements and 92% lacked adequate ‘whistleblowing’ channels.”³³⁵

Even where there is no AML supervision, which is at about 23%, a “risk-based approach” is still undertaken, some professional body supervisors, simply “lack the requisite skills and resources in their overall approach.”³³⁶ In part, some approaches to “taking robust AML enforcement action” have been influenced by “their ability to attract membership,” not wanting to run the “risk of repelling members.”³³⁷

There are no plans for a more unitary approach to AML, “nor a universally state-led one.”³³⁸ Overall in the UK there is a “need to demonstrate adequate understanding of risk,

perform[ance] of sophisticated compliance assessments and an [under]tak[ing] of an intelligence-led approach to favor larger supervisors with more resources within their grasp.”³³⁹

OPBAS was created in 2017, along with the introduction of money laundering regulations, the primary purpose of this organization is “intended to give effect to the requirement, and to strengthen UK’s anti money laundering supervisory regime.”³⁴⁰ In effect the OPBAS, is like the “supervisor of supervisors” with the aim of ensuring that professional body anti-money laundering supervisors comply with the UKs anti-money laundering obligations.”³⁴¹ The creation of the OPBAS followed, due to concerns that with only 22 SROs i.e. “self-regulatory organisations” there would be a significant “deficienc[y] in information sharing. According to “Article 48 of the Fourth Money Laundering Directive (MLD4) ... Member States [in the UK are] oblige[d] [and] require[d] [to allow] competent authorities [to] effectively monitor and take necessary steps to ensure compliance with the Directive.”³⁴² OPBAS, as part of the FCA, has the power to review and issue directions to SROs.³⁴³ With that power, they can determine whether there was a failure to comply with their “obligations under the Money Laundering Regulations” and if any “false or misleading information” was provided, then, and only then can the “OPBAS ...have the ability to publicly censure ... or recommend it be

removed as a designated SRO.³⁴⁴ Its important to note that “confidential information gathered by OPBAS will be subject to protections.” The FCA has “information gathering powers” which block and make it a criminal offense to “inappropriate[ly] disclose ... [any] SRO’s confidential information.”³⁴⁵

Examples of SROs and How They Been Affected?

Building a better “risk-based approach” to supervisors provisions, would be to find a “credible deterrent” to the “sharing of information both among supervisors and between supervisors and law enforcement.”³⁴⁶ The FCA is basically in a new role “overseeing the anti-money laundering and counter terrorist financing (“AML” and “CTF”) supervision by the 22 SROs in the accountancy and legal sectors.”³⁴⁷ The UK government, “intends that the FCA and SRO ... engage collaboratively ... [to] strengthen the AML supervisory regime ... focus[ing] on outcomes.”³⁴⁸

CONCLUSION

Applying a risk-based approach to anti-money laundering has proven to be most effective in countries like the UK, who put a greater emphasis on “focus on outputs” and which “resources

... will have the biggest impact.”³⁴⁹ When one applies a risk-based approach and takes “due diligence measures” this assures that money managing services will not be sued for “money laundering or terrorist financing.”³⁵⁰ Why its important to be compliant and to “develop effective and proportionate prevention procedures.”³⁵¹

So long as there is a “multiplicity of players involved in AML supervision.”³⁵² The UK will be able to run an effective anti-money laundering program, that involves creating internal controls which can determine suspected anti-money laundering, by using FIU’s financial intelligence units, as well as make use of SARs suspicious activity reports.³⁵³ Already as of January 10, 2020, a "principles-based approach" has begun to take place, "in the UK (and/or other parts of the EU) [wherein] immediat[e] review [of] their current internal procedures [have been] put into place, measures to ensure that relevant client due diligence (CDD) is conducted on any new clients."³⁵⁴ Implementing the 5th Money Laundering Directive, which has already taken hold of intermediaries, during the sale, course and scope of transactions involving any owners and collectors, laws which should apply during the planning and execution of any sale, even if

international financial aid and emergency funding,"³⁶⁰ makes it even more pressing that a "risk-based approach to customer due diligence" be taken inasmuch as each financial institution be assessed on the basis of "whether ... [they] heeded such guidance ... [and] whether financial institutions took appropriate steps to mitigate such risks, [if at] all from a post-pandemic, post hoc prism."³⁶¹

RECOMMENDATIONS

"Increased globalization of business operations" has been met with challenges in the past, when it comes to "coordinat[ing] ... [the] effective identification and apprehension of money launderers."³⁶² While the US and the UK share many similarities in terms of what "regulatory requirements [they require] for banking institutions," some have argued that between the two regimes, lies an inconsistent framework, upon which "obligations" have been imposed by the US which are "not fully consistent with UK financial sanctions."³⁶³ For example, there have been "differing levels of customer due diligence" programs enforced by both regimes: (1) The UK's "standard measures" abiding by a "know your customer" philosophy, "prescribed by Section 326 of the USA PATRIOT Act for US banks," whereas the US takes a "risk-based approach to

customer due diligence"³⁶⁴ that also doesn't require "beneficial owners of a customer" be identified, therefore in this type of difference it would be the banks responsibility when conducting a "risk assessment ... to obtain information about individuals with authority or control that includ[es] [both] authorized signatories and beneficial owners."³⁶⁵ Thus putting a lot of pressure on banks to keep up with regulatory requirements, when conducting business with both regimes, which is where "federal functional regulator[s]"³⁶⁶ come into play, because of the Bank Secrecy Act, financial institutions must enter contracts and certify annually that "the bank has implemented its anti-money laundering programme and will perform the specified requirements of the bank's customer identification programme."³⁶⁷

For example, "the UK's Open Banking regulation requires the country's nine big high-street banks to share customer data with authorized fintech providers."³⁶⁸ Who is fintech? Fintech is short for "financial technology," who seeks to "automate the delivery and use of financial services."³⁶⁹ There are many "fintech companies" who are responsible for "changing how the financial services ecosystem operates ... filling gaps where traditional banks and financial institutions have failed to meet customer needs."³⁷⁰ In the wake of COVID-19, FinCEN

has been particularly been met with the challenges imposed while meeting "certain BSA obligations ... for certain BSA report filings."³⁷¹ Certain measures should be taken to prepare in advance for responding to the increased chances of "malicious or fraudulent transactions," and be "alert to related illicit financial activity."³⁷² Fintech companies help aide and assist the functioning of banks, in addition to the "regulators" comprised by governmental bodies in each regime, such as "The Secretary of the Treasury," who enforces the BSA, as well as FinCEN.³⁷³ Whereas in the UK the "regulators" are the National Crime Agency (NCA) and the SFO "Serious Fraud Office," who enforce a number of "compliance responsibilities," this regulated sector is regulated in addition by the "Financial Conduct Authority" (FCA) and "Her Majesty's Revenue and Customs."³⁷⁴

In today's "globalised business environment," Banks i.e. "financial institutions" have to protect themselves "against financial crime."³⁷⁵ That means staying up to date with current laws and "regulatory change[s]" no matter what "political uncertainti[es]" may arise, and with reliance on "technological innovations," gear themselves with the EU's 5th Money Laundering Directives, and Brexit in mind, continue to be compliant with a "risk based approach"³⁷⁶ to avoid "key threats, vulnerabilities, and priorities for disrupting and preventing illicit finance activities

within and transiting the US Financial System."³⁷⁷ Which is why the US Department of Treasury issued a "roadmap to modernize" AML/CFT laws in the US to make them "more effective and efficient."³⁷⁸ A roadmap that includes "the various federal agencies" working together with "state and local authorities, particularly "where jurisdiction overlaps"³⁷⁹ would be helpful for both US and UK banks. This will help banks and financial institutions to properly enforce the "BSA statute" whenever "BSA regulatory requirements" are needed to be enforced in transactions between countries working with US financial institutions, and be able to "apply to all persons subject to US jurisdiction or to all US trades businesses," its important to understand why this pressure has been placed on banks, as a preventative measure, and also maintain accurate records in the event of oversight, that would require "monetary penalties" against US "branches and subsidiaries" or "foreign bank(s)" who do not comply and fail to "maintain books and records ... relating to their alleged BSA sanctions." Why is this important, because financial institutions whether or not "[any] financial regulator has imposed a penalty" civil penalties can still be brought and have the potential to force non-compliant banks to "surrender the license of its branch [and ability] to do business."³⁸⁰ Two agencies with the authority to impose civil penalties are the FINRA and the NFA in the US.³⁸¹ Whereas in the UK the HMRC "subject to the Regulators Code" is responsible for taking "civil measures action on the areas of greatest risk" with a higher likelihood of imposing sanctions "to the minority that do not comply" weighing

compliance without imposing "an unnecessary regulatory burden" and assess compliance based upon how "deliberate or persistent non-compliance" occurred.³⁸²

FUTURE AREAS OF RESEARCH

One of the problems where research is lacking on AML in the UK is that “there is limited evidence of how well the country investigates high-end money laundering.”³⁸³ The FATF and NCA and two intergovernmental organizations that have developed not only policies for combatting financial crime, but have also been criticized as “not sufficiently penaliz[ing] them for turning a blind eye.”³⁸⁴ One of the most common problems found recently by OPBAS is that their compliance is not sufficiently supervised, “nearly 25% of them do not perform any money laundering supervision [while] 80% failed to have the proper governance arrangements to combat it in their professions.”³⁸⁵

One of the "key AML problems" facing the UK, is their inability to "hamper regulators' abilities to respond to problems."³⁸⁶ According to PYMNTS, and The National Crime Agency (NCA) because of the "lack of enforcement" done by government agencies, this has had an effect on "companies and businesses" who are required to "place strong money laundering compliance

regimes" with little incentive.³⁸⁷ When there is "weak money laundering prosecution" this results in inadvertently fostering a philosophy where companies get penalized for non-compliance "to avoid being publicly named in many cases" yet still required to "go after individuals" when they cannot "fine banks or corporations for accepting laundered funds."³⁸⁸ Since the passing of Brexit, "the UK is no longer bound by EU law."³⁸⁹ Although the UK may not be bound by EU laws, they "already comply with the vast majority of" laws specifically "prohibiting [the] laundering of proceeds of specified predicate offences" with one exception when it comes to "vicariou[s] liability for acts of money laundering committed for their benefit by an individual in a leading position" which is why the MLD6 coming up will matter, "to see whether the government finds time to enact a new corporate offence of failing to prevent money laundering" before the MLD6 deadline.³⁹⁰ Why is this important? Whenever the UK is subjected to "equivalent jurisdiction for the purposes of due diligence obligations" many things matter to determine whether the corresponding EU state or "UK Customer" when being held to the same standards, have done a proper job of "assess[ing] the risks" and possessing the "requir[ed] documentation and information" while also accounting for "the burdens of complying with MLDs generally."³⁹¹ Therefore more research needs to be done whether or not in alignment to EU interests, to do their best to "take back control" over fulfilling these due diligence obligations according to their own
